

Stir02 Download and Installation Instructions

You should read and print these instructions before proceeding.

As you are a new Stir user, you need to install the core modules then upgrade to the latest version. If asked, choose <Y>es to overwrite existing files. In this document C: can of course be D: thru Z:

- Create a folder C:\Stir02\
- Download the Install file Stirinst.exe 2.7MB (a self-extracting zip file) to C:\Stir02\
- Download the Upgrade file Stir144.exe 1MB (a self-extracting zip file) to C:\Stir02\
- Double click on C:\Stir02\Stirinst.exe and wait a minute
- Double click on C:\Stir02\install.bat and read the screen
- Double click on C:\Stir02\stir.exe
- Press <enter> until you reach MainMenu, <R>eindex/check will run
- Select suitable fonts if necessary (<H>ousekeeping | <F>onts)
- Choose <F>ile-browsing then Browse/Print 1a thru 1e
- Delete files Stirinst.exe and Stir144.exe if you wish
